

MODULAR SPLICING CONNECTORS FOR COPPER NETWORKS

CAHORS offers multi-pair connection solutions for copper telecom networks.

Main Features

CAHORS offers multiple models of 10-pair and 25-pair brackets for connecting copper telecommunications cables. These compact solutions are for simultaneously connecting 10 or 25 subscribers. The displacement connection added to the self-healing gel ensures a quality connection in extreme weather conditions. Implementation is carried out using tools specially developed for this application.

CAHORS offers comprehensive expertise in the design, manufacture and qualification of all its brackets.

Benefits

- Multiple simultaneous connections
 - Proven products in extreme weather conditions
 - Connection quality guaranteed over time
 - Quick cabling
 - Economic product
-

Uses

- Telecommunications
- Operators
- Infrastructures
