

# OVERHEAD CONNECTION POINT FOR OPTICAL FIBRE TELECOM NETWORKS

---

Boxes for deployments of overhead Optical Fibre networks. Custom solution tailored to client applications and needs

## Main Features

Deploying local optical fibre loops requires having a wide range of overhead boxes. CAHORS offers modular, scalable solutions for connecting subscribers. The products can be adapted, as needed, based on the installation and operating rules imposed by the operators.

Overhead boxes are available in various materials (SMC, PVC, polypropylene, etc.) to meet the requirements of our customers while offering the best weather performance.

The CAHORS R&D department is involved at every step of the design of these products to offer the most appropriate technological solutions with a high level of security and protection.

---

## Benefits

- Scalable and modular products
- Custom solution
- Supports 8 to 56 subscribers
- Box security

---

## Uses

- Infrastructures
- Operators
- Public initiative networks
