

FLAT SATELLITE ANTENNAS

Flat satellite antennas: compact and discreet, ideal for campers. TV programme reception with excellent image quality.

Main Features

These antennas are compact and discreet, making them ideal for campers, caravans, lorries, and utility vehicles. They are compatible with all satellite receivers. Autoscane antennas use your GPS location to find a signal quickly.

There are three types of antennas:

- The Fixed Flat antenna with 1 to 4 satellite outputs (MINISAT Single, Twin or Quad)
- The Manual Movable Flat antenna (CAMP MANUEL)
- The Automatic Movable Flat antenna (SNIPE 2 or PRO)

Discover [QUICKSAT](#), CAHORS application dedicated to satellite antennas installation.
