

DISEQC SWITCHES AND TV-SAT COUPLERS

DISEqC switches: multiple satellite reception

TV-SAT couplers: used to couple a Satellite antenna with a TNT antenna

Main Features

DISEqC switches are used to couple multiple LNBS on a single coaxial cable in order to pick up reception from multiple satellites with one or more satellite cables on a single satellite receptor compatible with the DISEqC standard.

TV-SAT couplers are used to couple a Satellite antenna with a TNT antenna on a single coaxial cable, which is very convenient when adding an antenna to an existing cable!

Benefits

- Versions with waterproof mast boxes
 - 5G or 4G LTE protection (CST248-260)
 - 2 to 8 Satellite inputs + TNT coupling (DISEqC switches)
-

Uses

- Individual housing
