

PREAMPLIFIER KITS AND POWER SUPPLIES

Preamplifier kit and power supply: used to boost the incoming signal from a TNT terrestrial antenna for high quality reception

Main Features

There are three types of preamplifiers with different adjustable sheathings:

- 1 input for the TNT terrestrial only
 - 2 inputs for the TNT terrestrial with FM coupling
 - 2 inputs for the TNT terrestrial with Satellite coupling
-

Benefits

- Adjustable amplification levels
 - 5G or 4G LTE protection
 - Waterproof mast boxes and control indicator light
 - Power supply with two TV outputs
 - Wall or DIN rail mounting for the power supply
-

Uses

- Individual housing
