

TV COUPLERS AND SPLITTERS

TV Couplers: couple a TNT antenna with other antennas (TNT, FM or VHF)

Splitters: protect installations from 5G or 4G LTE transmitters

Main Features

TV Couplers are used to couple a TNT antenna with other TNT, FM or VHF antennas on a single coaxial cable.

Splitters are used to protect your installation from 5G or 4G LTE transmitters by removing their frequencies that disrupt your TNT reception.

Benefits

- Direct current (DC) support
 - High rejection
 - Waterproof mast boxes
-

Uses

- Individual housing
- Building
- Hotel
- Campsite
- Hospitals, retirement homes, prisons
- Cabled networks, housing
