

OPTICAL TERMINAL SOCKET OPTICAL FIBRE SUBSCRIPTION CONNECTIONS

FTTH optical fibre residential connection solution.

Main characteristics

CAHORS offers complete solutions for FTTH distribution in residential facilities.

The range of equipped subscriber connections makes it easy to connect Optical Terminal Sockets in homes because the cable is factory-fitted on the socket end. Our cable reel system makes unwinding the cable simple under normal conditions when pulling cable to the floor connection box, or Optical Connection Point.

CAHORS offers two product ranges:

- Optical Terminal Socket semi-terminated range
- Two-way 100% terminated range

Advantages

- Micromodule cable that can be peeled without tools
- Recyclable cardboard cable reel
- 1 / 2 / 4 OF range
- Various ranges available from 15 to 100 metres
- Semi-terminated or 100% terminated

Uses

- Collective residential
- Private residential
- Tertiary
