SERIE 200 COMMUNICATION BOARDS

Solutions for centralising and distributing multimedia networks in a standard format.

Main characteristics

Installed in the dwelling’s service duct, the communication box allows centralisation and distribution of the multimedia networks serving all the rooms in the home. The SERIE 200 offers standard solutions that comply with applicable standards.

A range of connection accessories for these communication boards is also available: DTI, cables, RJ45 sockets, TV/SAT distributors, operator box shelf, etc.
