

# OPTICAL FIBRE FOR 1 SATELLITE

---

The QUAD or QUATTRO Virtual + LNB Optical set can distribute over optical fibre for 1 satellite.

---

## Main characteristics

The Quad or Quattro Virtual + LNB Optical set can distribute over optical fibre for 1 satellite. Optical fibre offers the benefit of being smaller than a coaxial cable (3 mm compared to 7 mm) and is especially well suited for long distances.

- The products can be powered remotely or over a 220 V sector.
  - The Quad Virtual can connect 1 to 4 SAT receivers.
  - The Quattro Virtual is used for collective facilities.
- 

## Advantages

- LNB with optical output
  - Zamak housings
  - Easy to use
- 

## Uses

- Buildings
- Campsites
- Housing
