

ABOVE GROUND WATER METER BOXES

Above ground water meter boxes connecting customers to the drinking water distribution network: integrates cut-out, smart metering and check valve functions.

Main characteristics

Made of glass reinforced polyester (GRP), these above ground water meter boxes are suitable for connections:

- with DN15 inline meters (from 1 up to 5)
- with DN20 inline meters (from 1 to 2)
- fitted with an isolation tap and a check valve with purges

Different options upon request:

- Wall or pedestal mounted
- Protection against frost
- Meter support rail
- Pedestal

Advantages

- Light
- Resistance to impacts and external aggressions (corrosion, UV)
- Easily accessible and easy maintenance and meter reading

Uses

- Individual connection and residential applications
- Collective connection
- Private sector installation
- Public sector installation
