

CUSTOMISATION AND SERVICES

Customised services for polyester cabinets, boxes and housings: research, equipped solutions, machining, cutting, accessories and colouring.

Main characteristics

CAHORS tailors its product ranges to best meet the needs and particulars of its customers' specifications:

- Customised research: expertise, research methods and testing provided through your designated design office.
 - Customised solutions: CAHORS manufacturing resources offer fully wired, ready-to-install solutions.
 - Machining of boxes according to your plans: CAHORS enclosures are designed for any type of application and can be equipped with various equipment: running cables, ventilation system, equipment reception resources, etc. Our teams handle all of the machining needed for your applications.
 - Baseplate cutting (metal or polyester) based on your equipment mounting operations.
 - Accessories and equipment: equipment available for metering, protection, connection network bypasses, etc.
 - Enclosure colouring to better integrate into the surroundings. Bi-component acrylic polyurethane paint with very high mechanical and weather resistant (weather and ultraviolet radiation), ensuring a long life and minimal maintenance.
-

Advantages

- "On demand" configurations
 - Available industrial means, including for small-scale customisation
 - Integration of solutions and electrical equipment based on customer specifications
-

Uses

- Public electrical energy distribution
- Manufacturing
- Tertiary
- Renewable energies
