

METERING PANELS

Metering panels accommodating the meter and single-phase or three-phase switch and its accessories.

Main Features

This panel accommodates the meter and the switch for connecting a single-phase customer whose subscribed power is less than 12 kVa or a three-phase customer whose subscribed power is less than 36 kVa. It supports a CBE or Linky meter.

It is usually installed inside of the housing in a Dwelling Service Duct.

There is a single-phase, three-phase and integrated circuit breaker version. It also comes with 16 mm² copper meter/switch connection wires.

Benefits

- Time savings thanks to the IPXXB piercing connectors
 - Switch from a CBE - Linky meter without disconnecting cables or removing the switch
 - Ergonomic and attractive
 - Compact size
 - Consistency with the range
-

Uses

- Collective housing
- LV network
- Individual connection
