

SME METERING SET

A set for the low voltage metering of a high power electrical installation of 36 kVA to 1250 kVA (20 kV).

Main Features

This equipment accommodates the SME meter and its corresponding modem.

It allows the connection of voltage U and I cables from a LV or MV monitored power facility with LV metering at the SME meter.

It is installed inside of a customer HVA/LV station or service room.

It is equipped with two voltage and intensity test boxes, a voltage protection circuit breaker, an intensity short-circuiting amperage terminal and an RJ45 client socket.

Available as a box or control panel.

Benefits

- Compact
 - Synthetic material
-

Uses

- Tertiary
- HTA/LV customer station
- LV and MV monitored power customer
