

PERIPHERAL EQUIPMENT FOR A LINKY COUNTER

CAHORS offers equipment for migrating facilities to the BPL (Broadband over Power Line) counter.

Main characteristics

Various kits are available for converting existing facilities by simplifying the implementation and reducing the installation time, such as the LINKY single phase counter adaptation kit and control kit. For old or outdated facilities, it is necessary to replace with new equipment, such as a single phase or three phase metering panel.

Benefits

- Ergonomic kits that reduce installation time
 - Offering tailors to all connection configurations
-

Uses

- Individual
- Collective
