

C100/P100 POWER BOX

100A breaker and 100A protection set for underground low voltage distribution networks.

Main characteristics

The C100/P100 power box used on underground low voltage public distribution networks offers:

- Protection of connections up to 36 kVA with limited power whose connection does not exceed 100 m
- Protection of monitored power connections of up to 59 kV
- Added protection for long distance overhead low voltage networks

Available in terminal and box versions.

Advantages

- Compact enclosure
 - IP2X ergonomic connection
-

Uses

- Individual connection
- Network infrastructures
