

## ECP-2D (OR C400/P200) POWER BOX

Two-way 400A breaker and 200A protection set to supply power to a collective set or individual connection with high power.

---

### Main characteristics

The ECP-2D (or C400/P200) power box is used to supply power to a collective building and to protect a high power individual connection or a breaker on a low voltage network. It connects two cables ranging from 50 to 240 mm<sup>2</sup>. To uses 200A fuses for the protection function and 400A disconnecting strips for the breaker function. The insulating enclosure includes two crossbars with an IP2X connector and a cable support system.

---

### Advantages

- Easy wiring
- Integrated IP2X protection

---

### Uses

- Collective housing
- LV network
- Individual connection
