

# S15 ELECTRICAL METERING AND CONNECTION BOXES AND TERMINALS

---

Range of electrical boxes and terminals for connecting, protecting and metering a customer connection

## Main Features

This long-standing box in the CAHORS range provides electrical connections for individual homes. The S15 range consists of a box, metering panels and bases.

- There are three types of bases that can contain network and connection grids: an equipable version, a non-equipable version and a Paninter-only box support
- A box function accommodating the branching grid
- HN 62 S 15 standard - PANINTER

---

## Benefits

- Product robustness and longevity
- Network and connection functions
- Multiple possible integrations: flush, protruding, pole, etc.

---

## Uses

- Residential
- Individual
