

CABLE END-FITTINGS

Equipment ensuring the protection and sealing of cable ends for LV overhead networks on poles and walls.

Main characteristics

These products seal and insulate (1kV) cable ends and cable fan sections.

Advantages

- High resistance to weathering
- Single-pole covers for 3 to 70 mm-diameter cables (colour options)
- Covers for end-fittings and fan sections of 47 to 120 mm-diameter cables
- Covers for end-fittings and fan sections of cables with 1 to 4 outputs
- Pole and wall application

Uses

- Public distribution of electrical energy
- Public lighting
