

# OVERHEAD NETWORK ACCESSORIES

---

Range of accessories used to install LV overhead lines.

---

## Main characteristics

The range comprises attachments (tension devices, meshing, cable clamps, thimble, pulley) and insulated tools used for maintenance.

Insulated tools are used for maintenance work on twisted insulated overhead conductors and on underground conductors. They are used during low voltage implementation (500V).

---

## Advantages

- High resistance to weathering
  - Pole and wall application
- 

## Uses

- Public distribution of electrical energy
- Public lighting
