

CABLE HOLDERS

Products designed to attach and guide cables and pipes.

Main characteristics

These products are designed for use with all types of installation: electrical, climatic, plumbing, etc.

They are also recommended for tunnel installations such as railways, underground or motorway tunnels.

Advantages

- Material: Metal bracket, stand and hook made of F-1110 steel
 - Continuous maximum operating temperature: 105°C
 - Dielectric strength: 4.5kV and 67 Shore A hardness
 - Synthetic covering made of 2.5 mm-thick polyvinyl chloride
 - Comprehensive range with dimensions from 52x70 to 84x210 mm
 - Comprehensive range with lengths from 100 to 868 mm
 - Compliant with standard UNE EN 100083
-

Uses

- Public distribution of electrical energy
- Public lighting
- Infrastructure
