

HEAT RETRACTABLE AND COLD RETRACTABLE SEALING MATERIAL

Equipment for sealing indoor and outdoor electrical connection and network cable heads.

Main Features

Two available technologies: heat retractable and cold retractable A wide range of insulating seals for different cable types and shapes, including:

- Heat retractable ends for a LV network and connection cable
 - Cold retractable ends for a connection cable
 - Cable caps, for disconnected cables on turntables or in trenches
 - Sleeves: neutral and phased conductive insulation
 - Tubes: junction sleeve insulation and sealing
 - Termination: insulated and sealed ends of cables that can be buried
-

Benefits

- Complete range for different cables.
 - Quick implementation
-

Uses

- Sealing and insulation for underground and overhead cables
- LV connection and network
