

DISTRIBUTION BOXES FOR TYPE 445 AND 446 OVERHEAD LV NETWORKS

Overhead-underground riser boxes for an overhead or overhead-underground network.

Main characteristics

Overhead-underground riser boxes are designed for distribution in an overhead network. They make it possible to cross pavement and structures.

These glass fibre reinforced polyester boxes comes with a set of brackets for pole mounting.

They are comprised of a tank and a cover for natural convection ventilation.

They are equipped with a connector and bypass of up to 150 mm² and also connect to a public lighting circuit.

They provide IP43 protection and IK10 impact resistance.

Advantages

- High resistance to weathering
- Glass fibre reinforced polyester
- Self-extinguishing material
- Connection for a copper or aluminium connection
- 2 available box sizes
- IP 43, IK10

Uses

- Public distribution of electrical energy
- Renewable energies
- Public lighting
