

# Communication Equipment Division Product Overview

Going international to develop the Group's strengths

Trading while respecting essential values

## CAHORS CONNECTING ENERGY AND PEOPLE

### CONNECTING. LINKING.

For over 100 years, that has been the driving force of Groupe Cahors. Together, the men and women of Cahors over the world, work to help transport energies and facilitate access to information. They combine their skills and contribute technical and innovative solutions that enable us to connect individuals and companies to the resources they need, such as electricity, information, water and gas.

CAHORS offers comprehensive solutions and equipment suited to the specificities of electricity, water and gas distribution networks and communication networks all around the world.

### Key Figures

Consolidated Turnover : 215 M€

Workforce : 1.730

Investment in R&D : 6% of turnover

**17** SUBSIDIARIES  
WORLDWIDE

### Our Activities

#### Solutions for Medium Voltage Networks

CAHORS offers global solutions, equipment and services suited to the specificities of Medium Voltage electricity distribution networks, all around the world.

Our complementary business units and skills and our technological expertise enable us to develop substations combining transformers, Medium Voltage switchgears, Low Voltage boards, high-tech electronics, and even remote network monitoring.

**MV-LV Distribution & transformation • MV-LV Connections**

#### Solutions for Low Voltage Networks

CAHORS develops a range of solutions tailored to all needs: connection, metering, distribution and protection. Our equipment is installed near residential areas: individual and collective dwellings, public or industrial buildings. CAHORS offers products that can be adapted to the requirements of any type of location: underground connections, street lighting units, cabinets, floor distribution panels and electric charging stations.

**LV Distribution - Service - Metering AMM • Automated Meter Management • Street Lighting**

#### Solutions for Communication Networks

CAHORS proposes you innovative products for communication equipment including: Television distribution, Fibre optic solutions, copper connectors, Voice-Data-Images products, etc. With CAHORS, we can meet all the needs of the market, from the operator to the subscriber.

**Civil Engineering • Copper Outside Plant • FTTH outside plant • In Building**

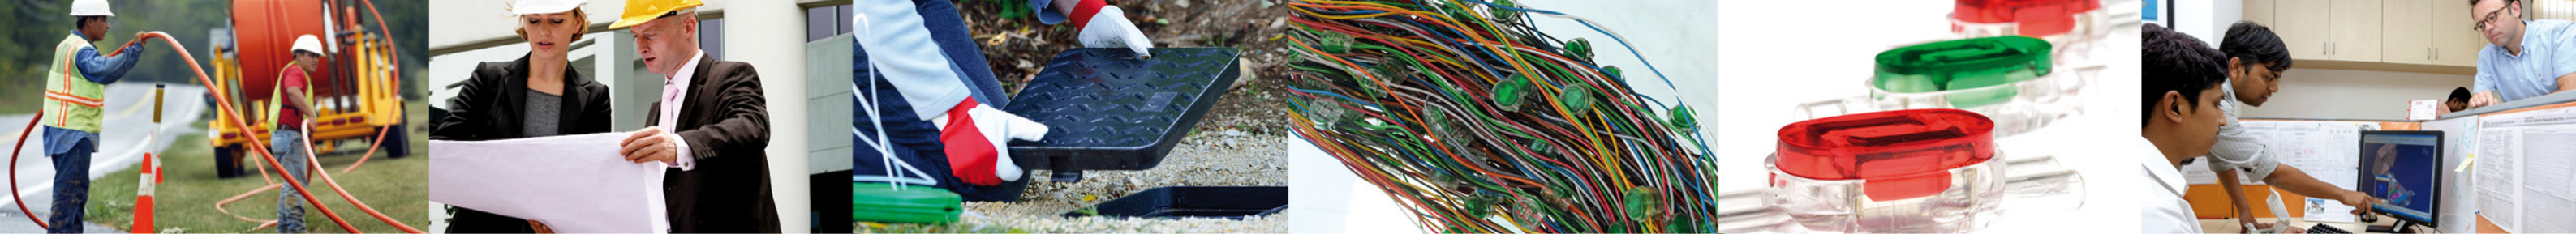

#### Distribution of fluids

CAHORS helps to develop drinking water distribution networks on all five continents. Our units, underground modules and comprehensive connecting solutions combine efficiency and environmental integration. CAHORS also works in gas distribution, in urban and rural areas: units and under-pavement modules. Our expertise in electronics has led to remote readings of fluid meters.

**Distribution - Service - Metering • AMR - Automatic Meter Reading • Production and storage of domestic hot water • Sanitary equipment : shower trays and kitchen sinks**

## Civil Engineering

The Civil Engineering range CAHORS has been developed to meet the needs of business Telecommunications.

The products manufactured in SMC offer significant competitive advantages against traditional concrete solutions.

Repeater box

Underground cable draw-in-box

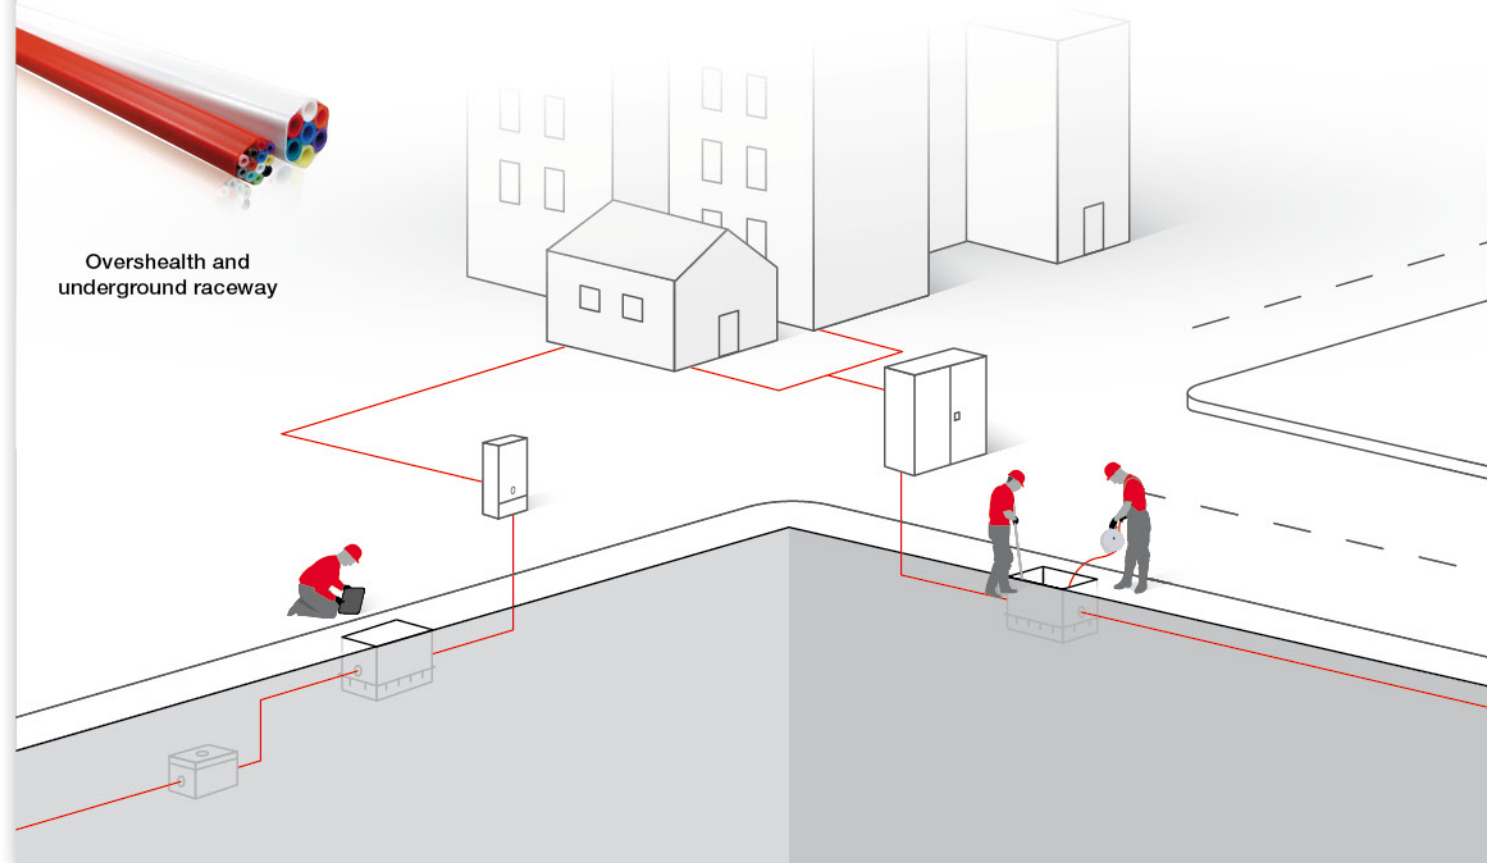

Railway cable trough

Underground deployment accessories

Oversheath and underground raceway

## Copper Outside Plant

Today, CAHORS is a specialist in telecommunication connections and offers a complete range of products for overhead copper connectors and telecom cabinets.

Splicing and protection box

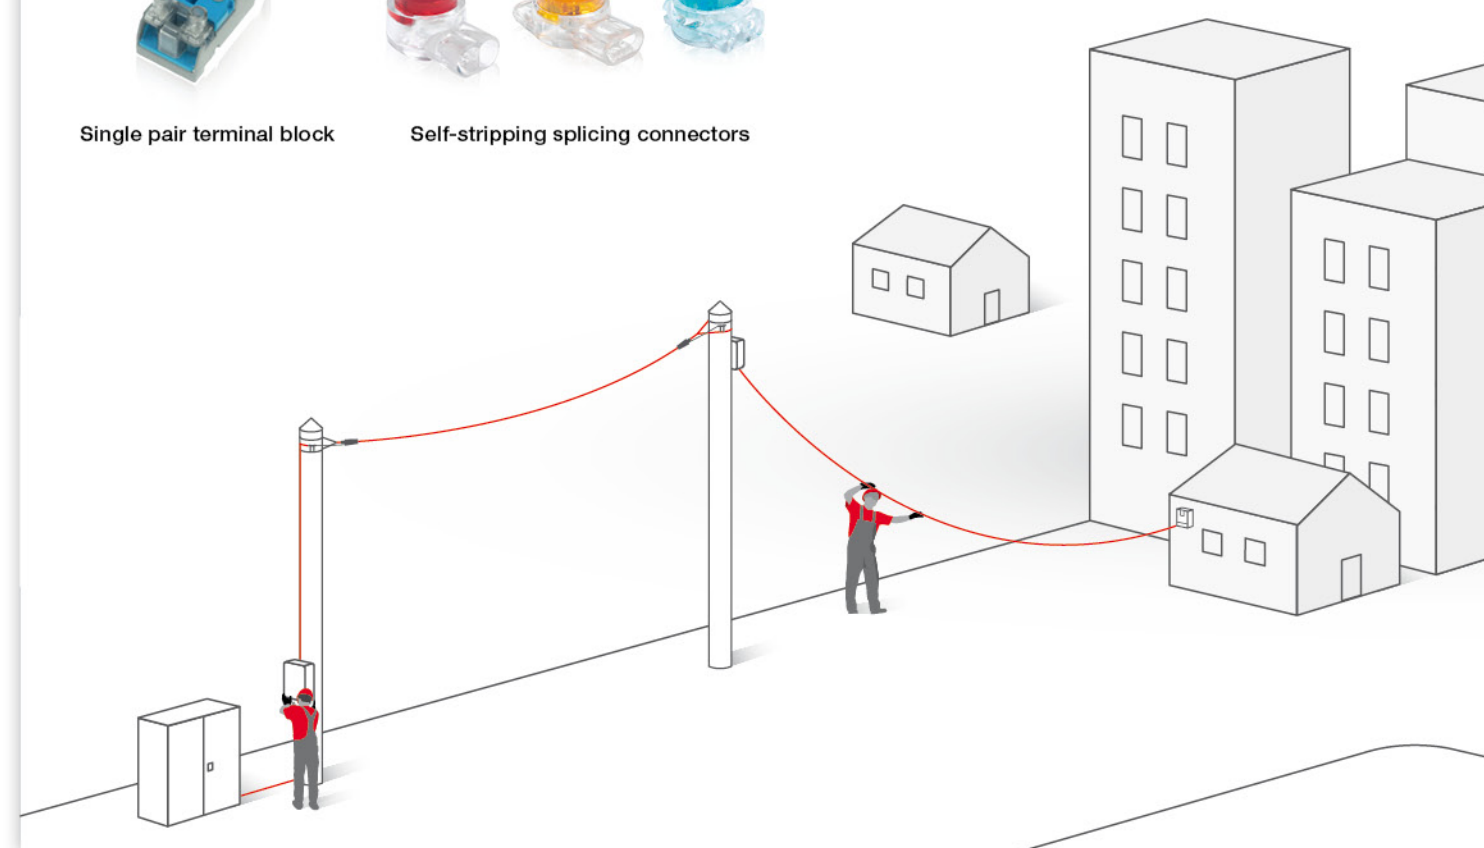

Fixing for CU aerial networks

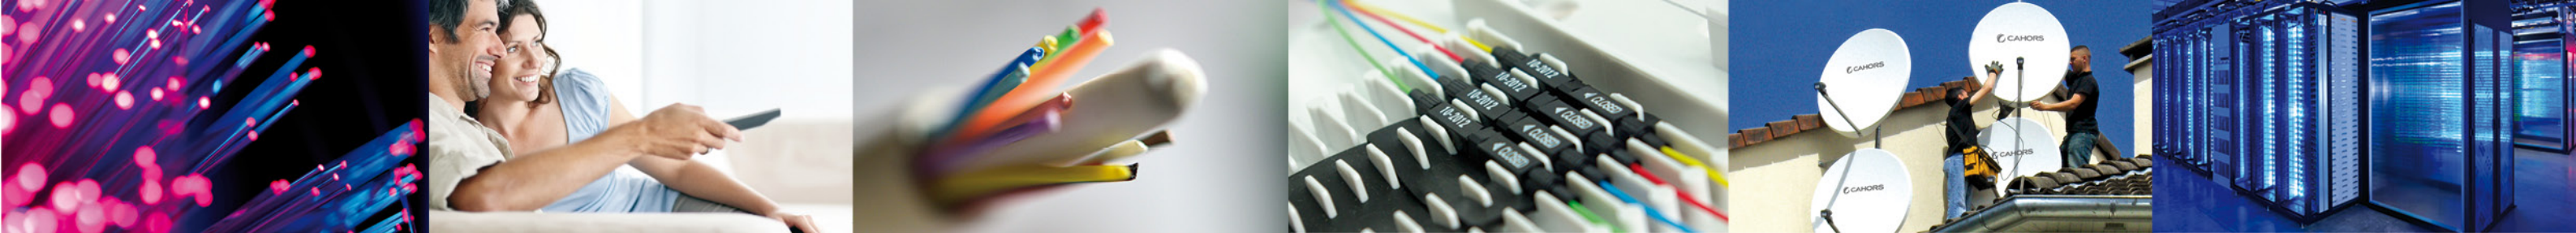

Single pair terminal block

Self-stripping splicing connectors

## FTTH Outside Plant

CAHORS offers a wide range for telecommunication connections including a complete range of products for overhead fiber optic connectors and telecom cabinets.

Cross connection cabinet

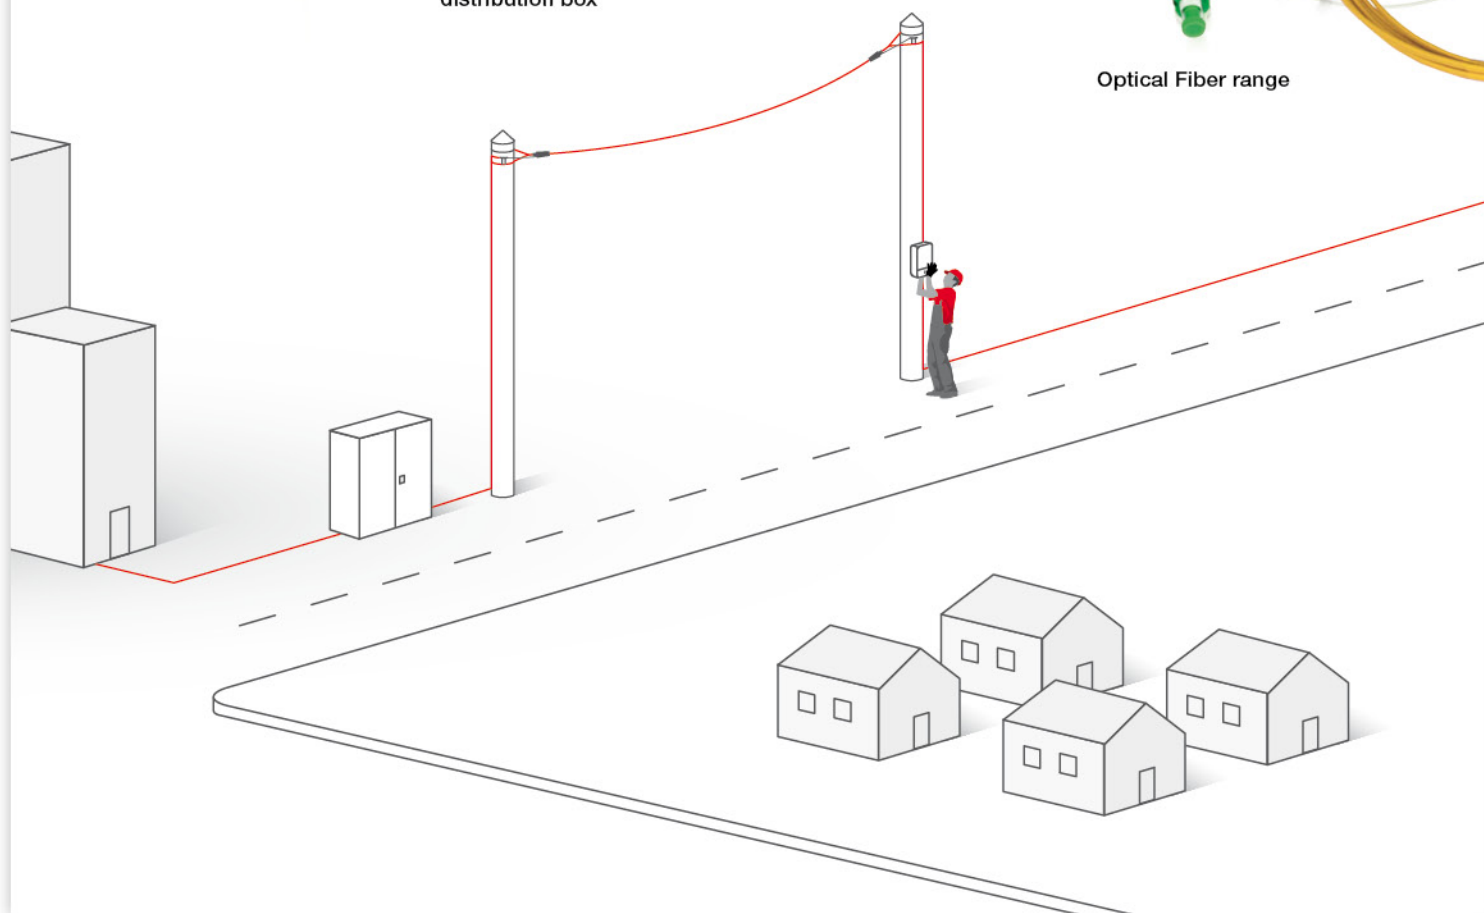

Outdoor optical fiber distribution box

Fixing for FO aerial networks

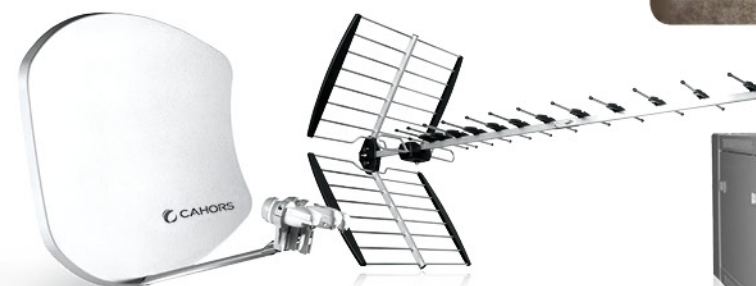

Optical Fiber range

## In Building

CAHORS offers a wide range of products for professional reception and distribution of terrestrial and satellites television signals.

With its 20 years of experience, CAHORS is an international reference for the distribution of television signals.

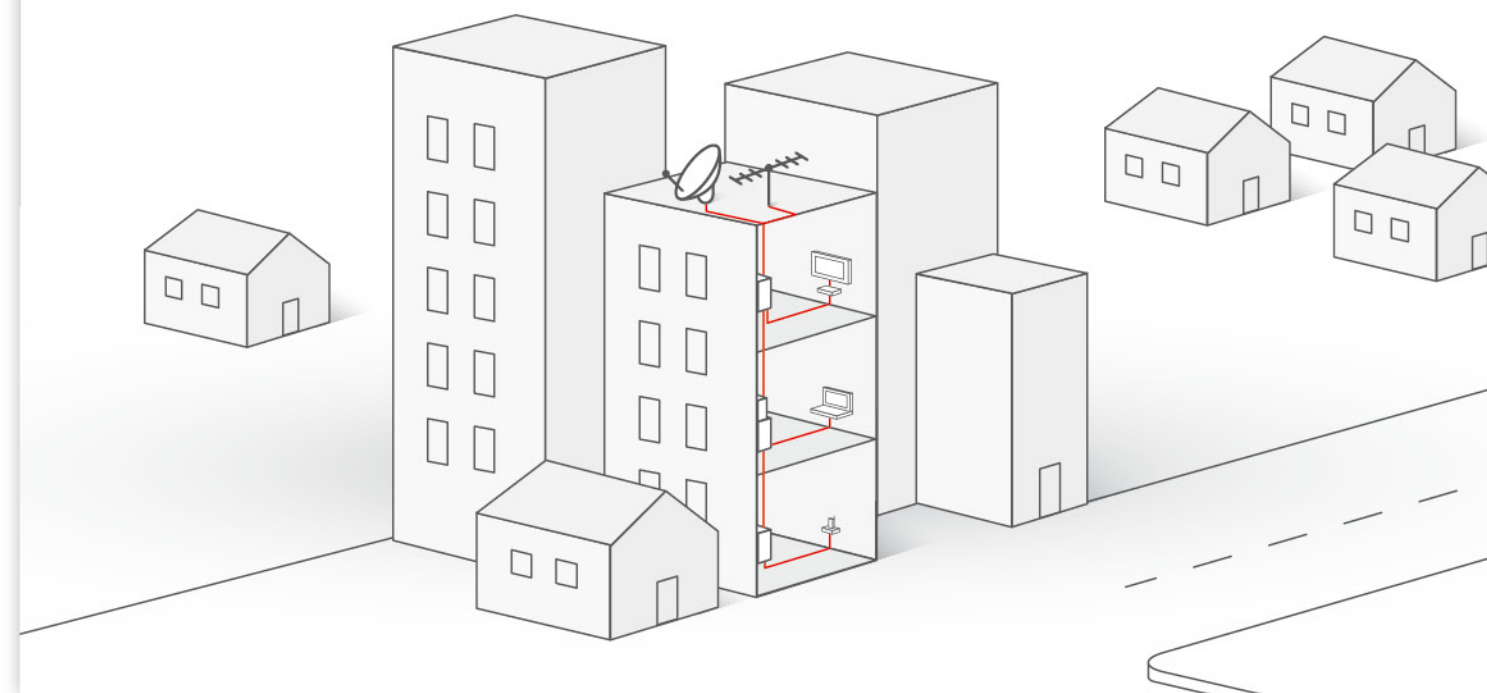

Television equipment

Voice, Data, Images

FTTH:  
Fiber To The Home solutions

## Communication Equipment Division

The Communication Equipment Division specialises in solutions and equipment for communication networks. The range of product includes: Television distribution, Voice-Data-images products, Optic Fiber and Copper - Building networks - Outside plant, Civil engineering equipment for outside plant.

### A sales team at your disposal.

- Our services:
- Work, case studies, technical support
  - Support for writing your technical specifications
  - Guidance for your projects
  - International R&D support

## 5 production plants on 4 continents

Distribution in more than 50 different countries

### Europe

**FRANCE / HEAD OFFICE**  
MAEC - CAHORS

**SPAIN**  
CAHORS ESPAÑOLA - VILAMALLA

### Asia

**INDIA**  
TEK COMPONENTS - PUNE

### South America

**URUGUAY**  
CAHORS LATINOAMÉRICA - CANELONES

### North Africa

**MOROCCO**  
OGE - CASABLANCA
